

Covariate effects on parameter kabs

Reference individual:

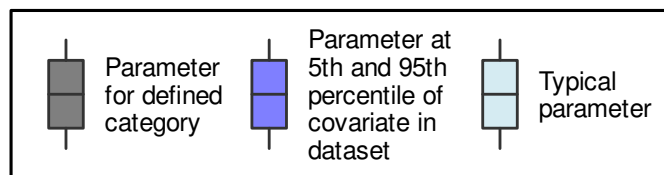

Age: 31.5 Years

Bodyweight: 77 kg

Gender: male

Change in parameter relative to reference individual
Box plots: 2.5% / 25% / 50% / 75% / 97.5% (uncertainty of covariate effect)

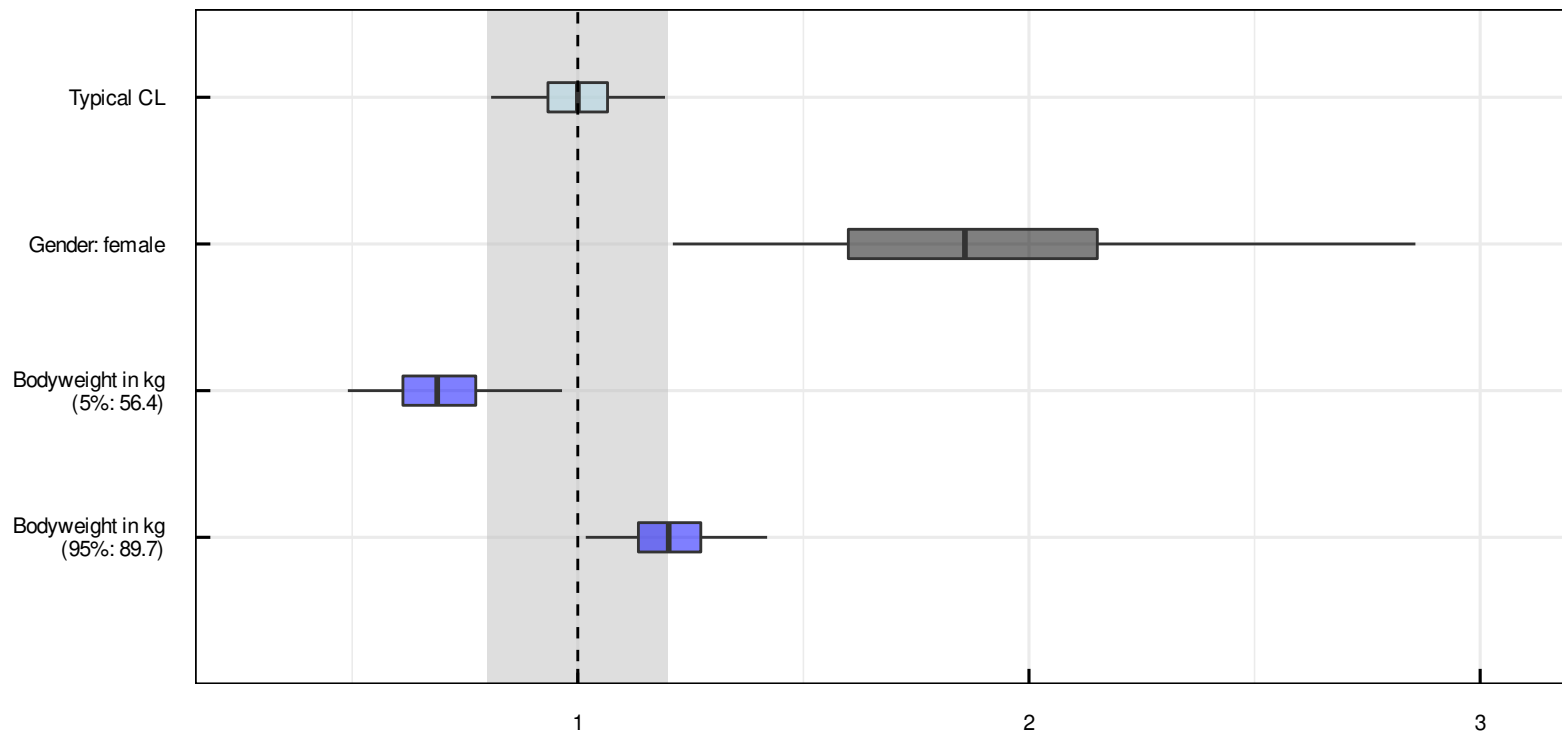

Covariate effects on parameter CL

Reference individual:

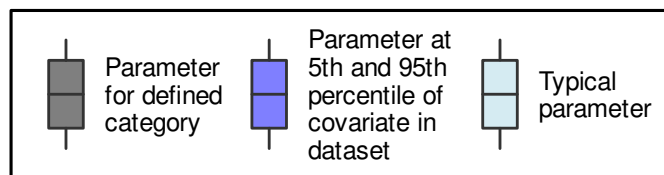

Age: 31.5 Years

Bodyweight: 77 kg

Gender: male

Change in parameter relative to reference individual
Box plots: 2.5% / 25% / 50% / 75% / 97.5% (uncertainty of covariate effect)

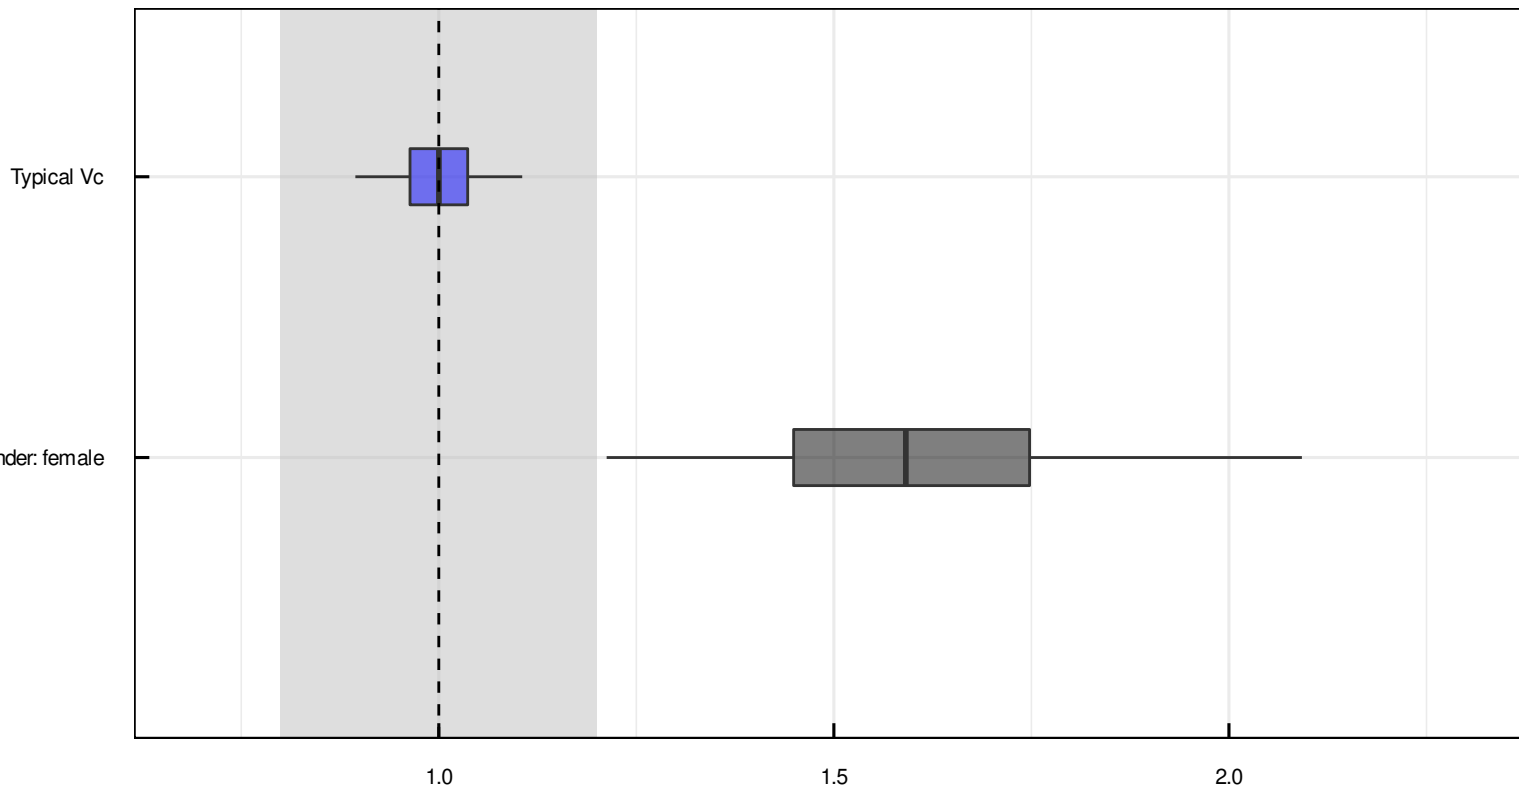

Covariate effects on parameter Vc

Reference individual:

Age: 31.5 Years

Bodyweight: 77 kg

Gender: male

Change in parameter relative to reference individual
Box plots: 2.5% / 25% / 50% / 75% / 97.5% (uncertainty of covariate effect)
