

# Covariate: AGE (Age)

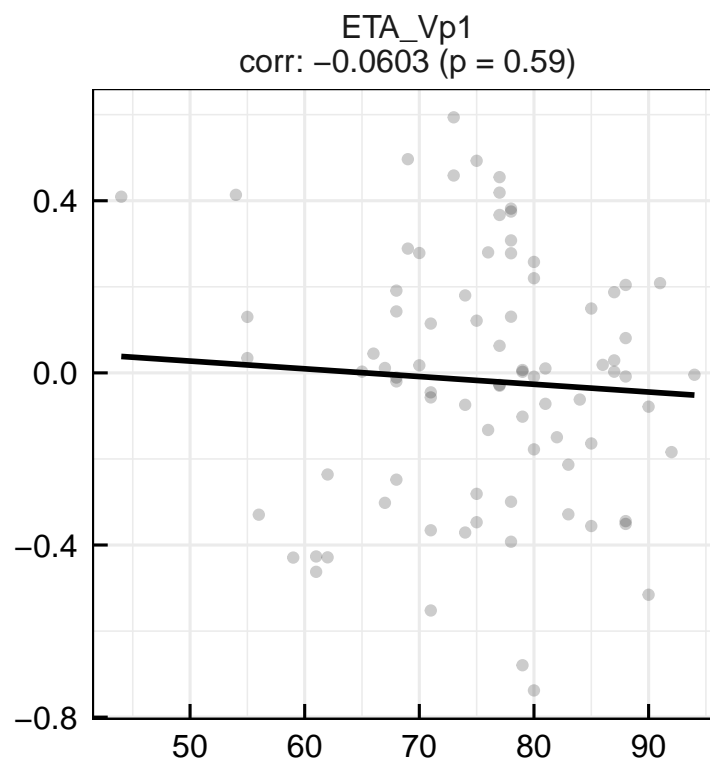

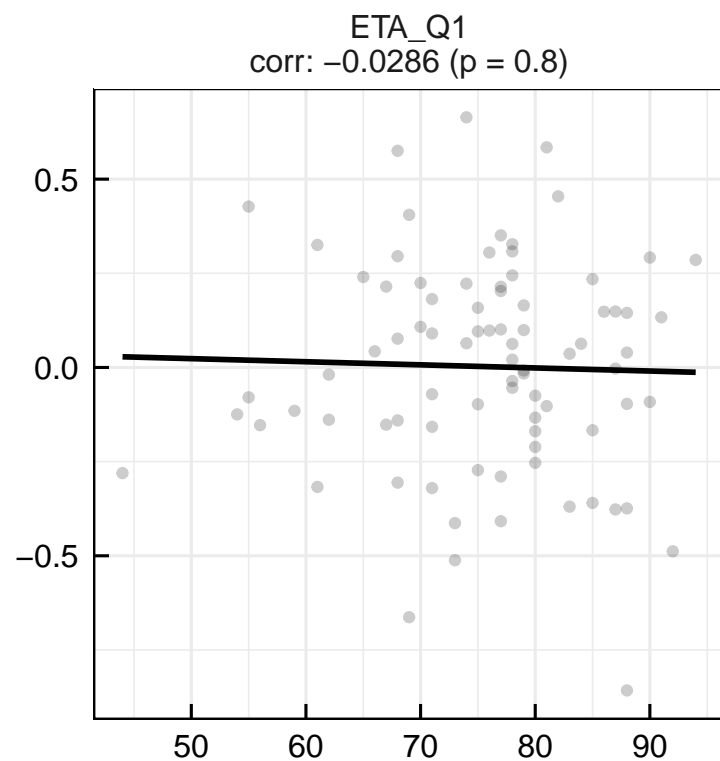

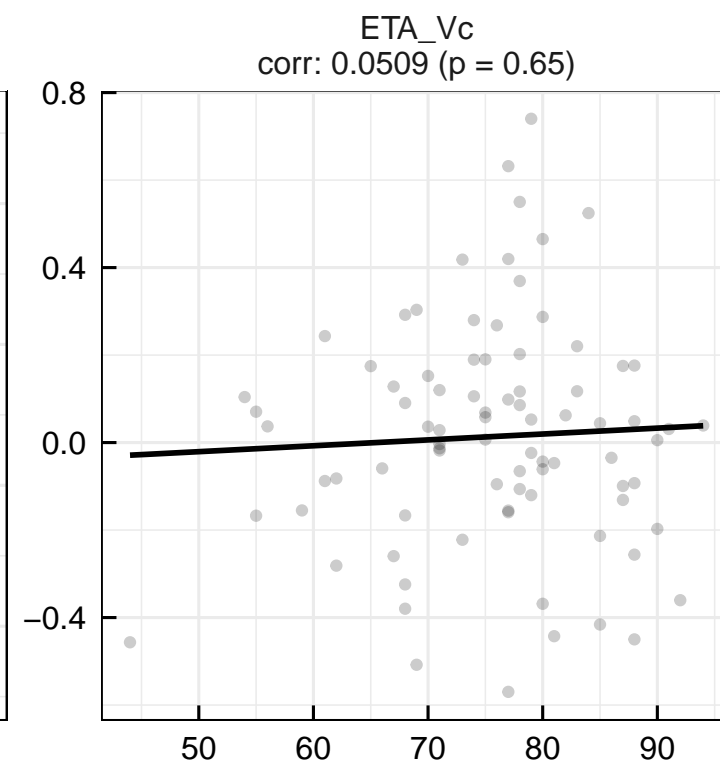

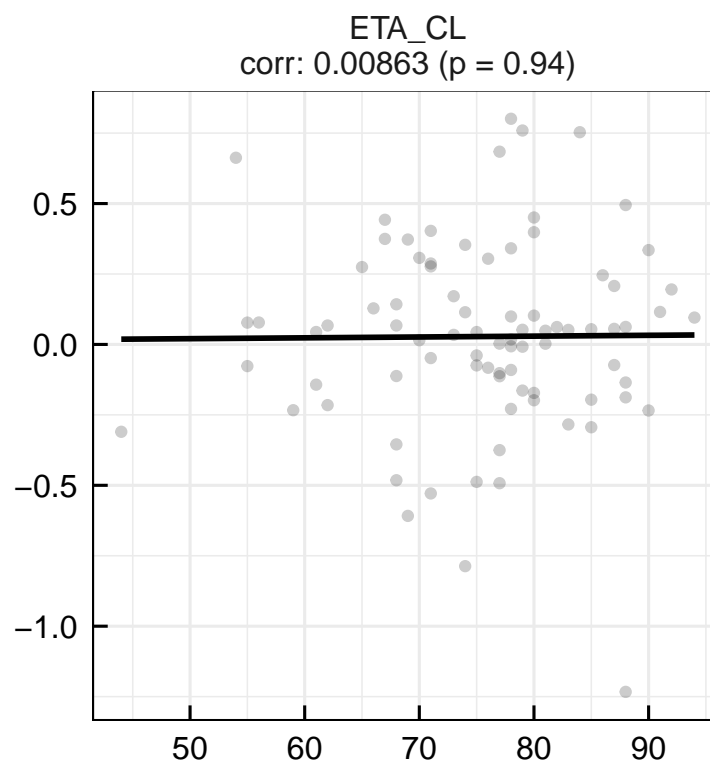

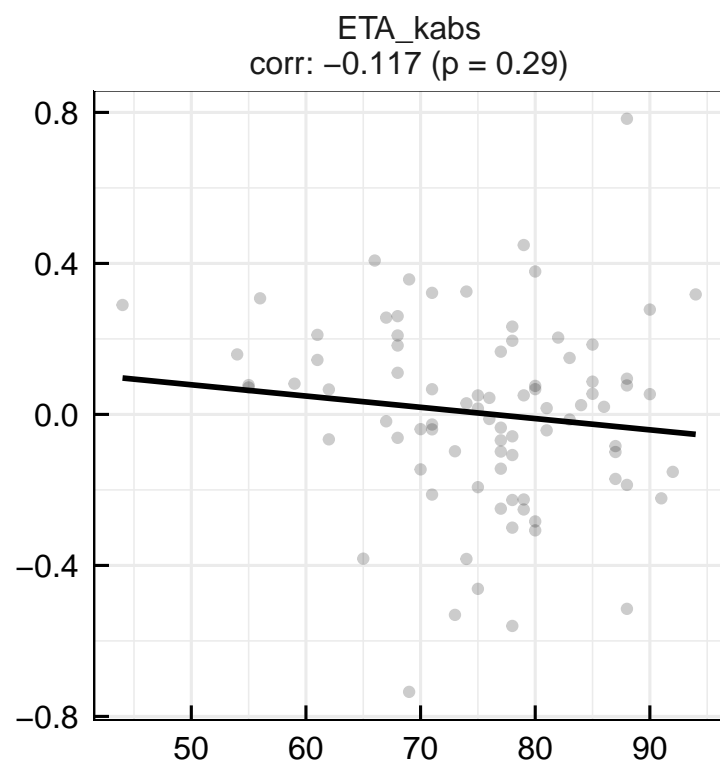

Individual random effects versus covariate

|corr|>0.3 — no

# Covariate: WT0 (Bodyweight)

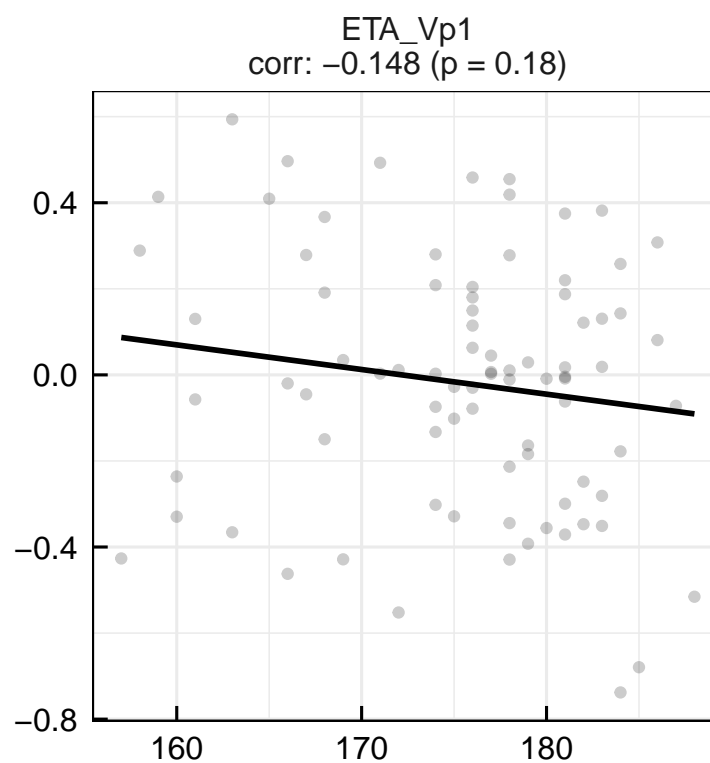

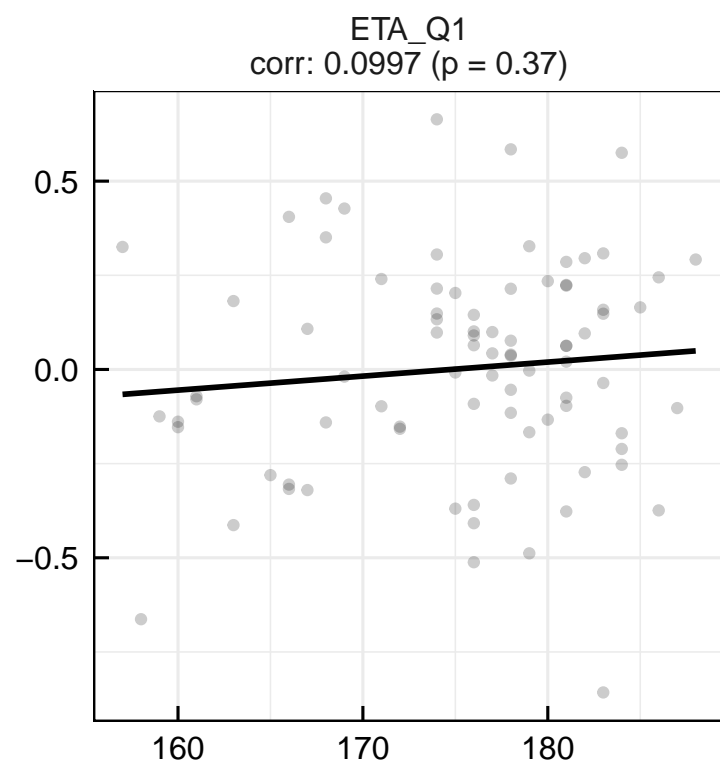

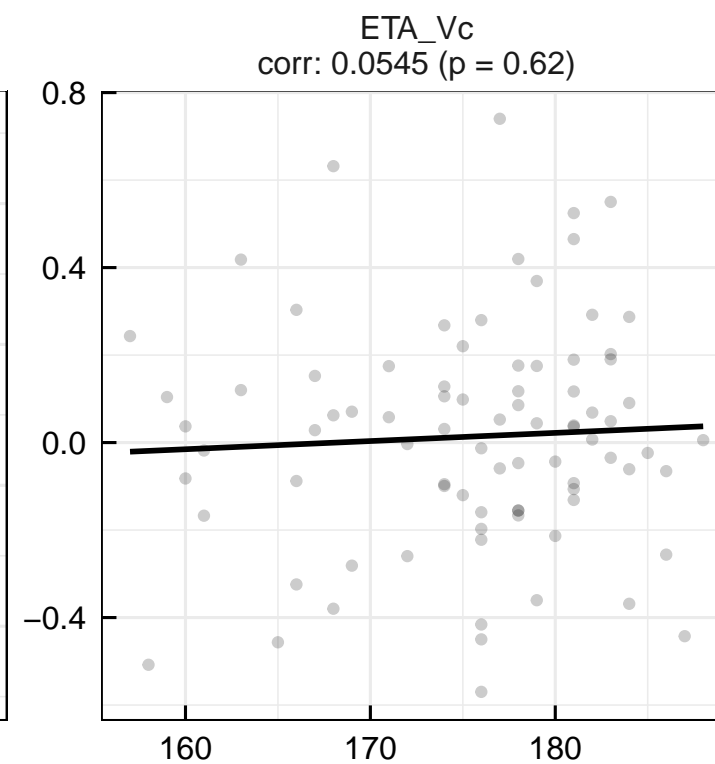

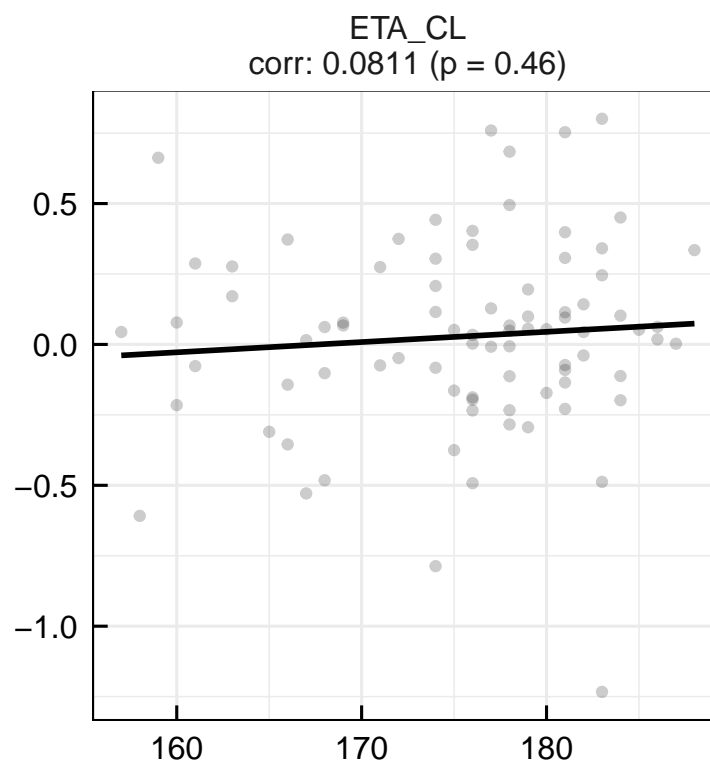

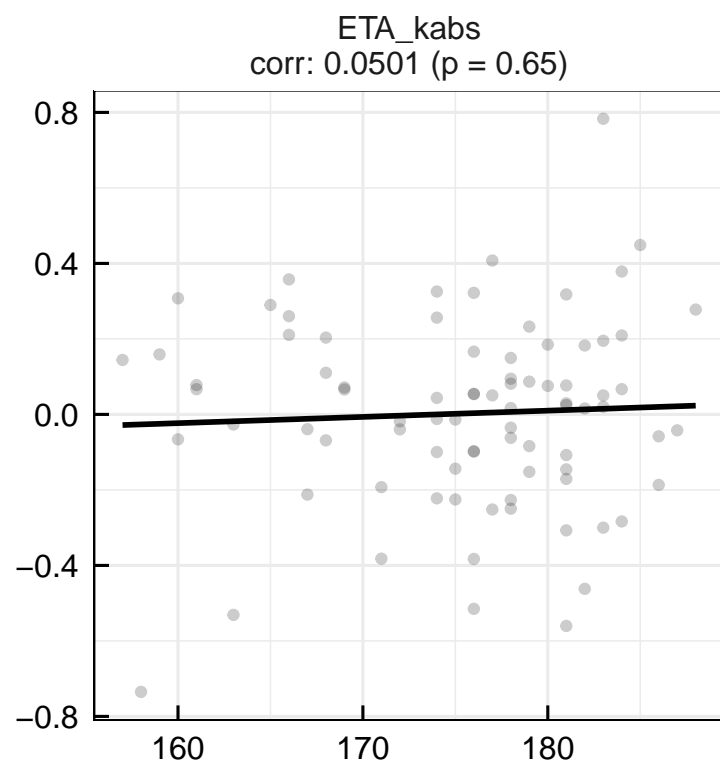

Individual random effects versus covariate

$|corr| > 0.3$  — no

# Covariate: HT0 (Height)

Individual random effects versus covariate

|corr|>0.3 — no

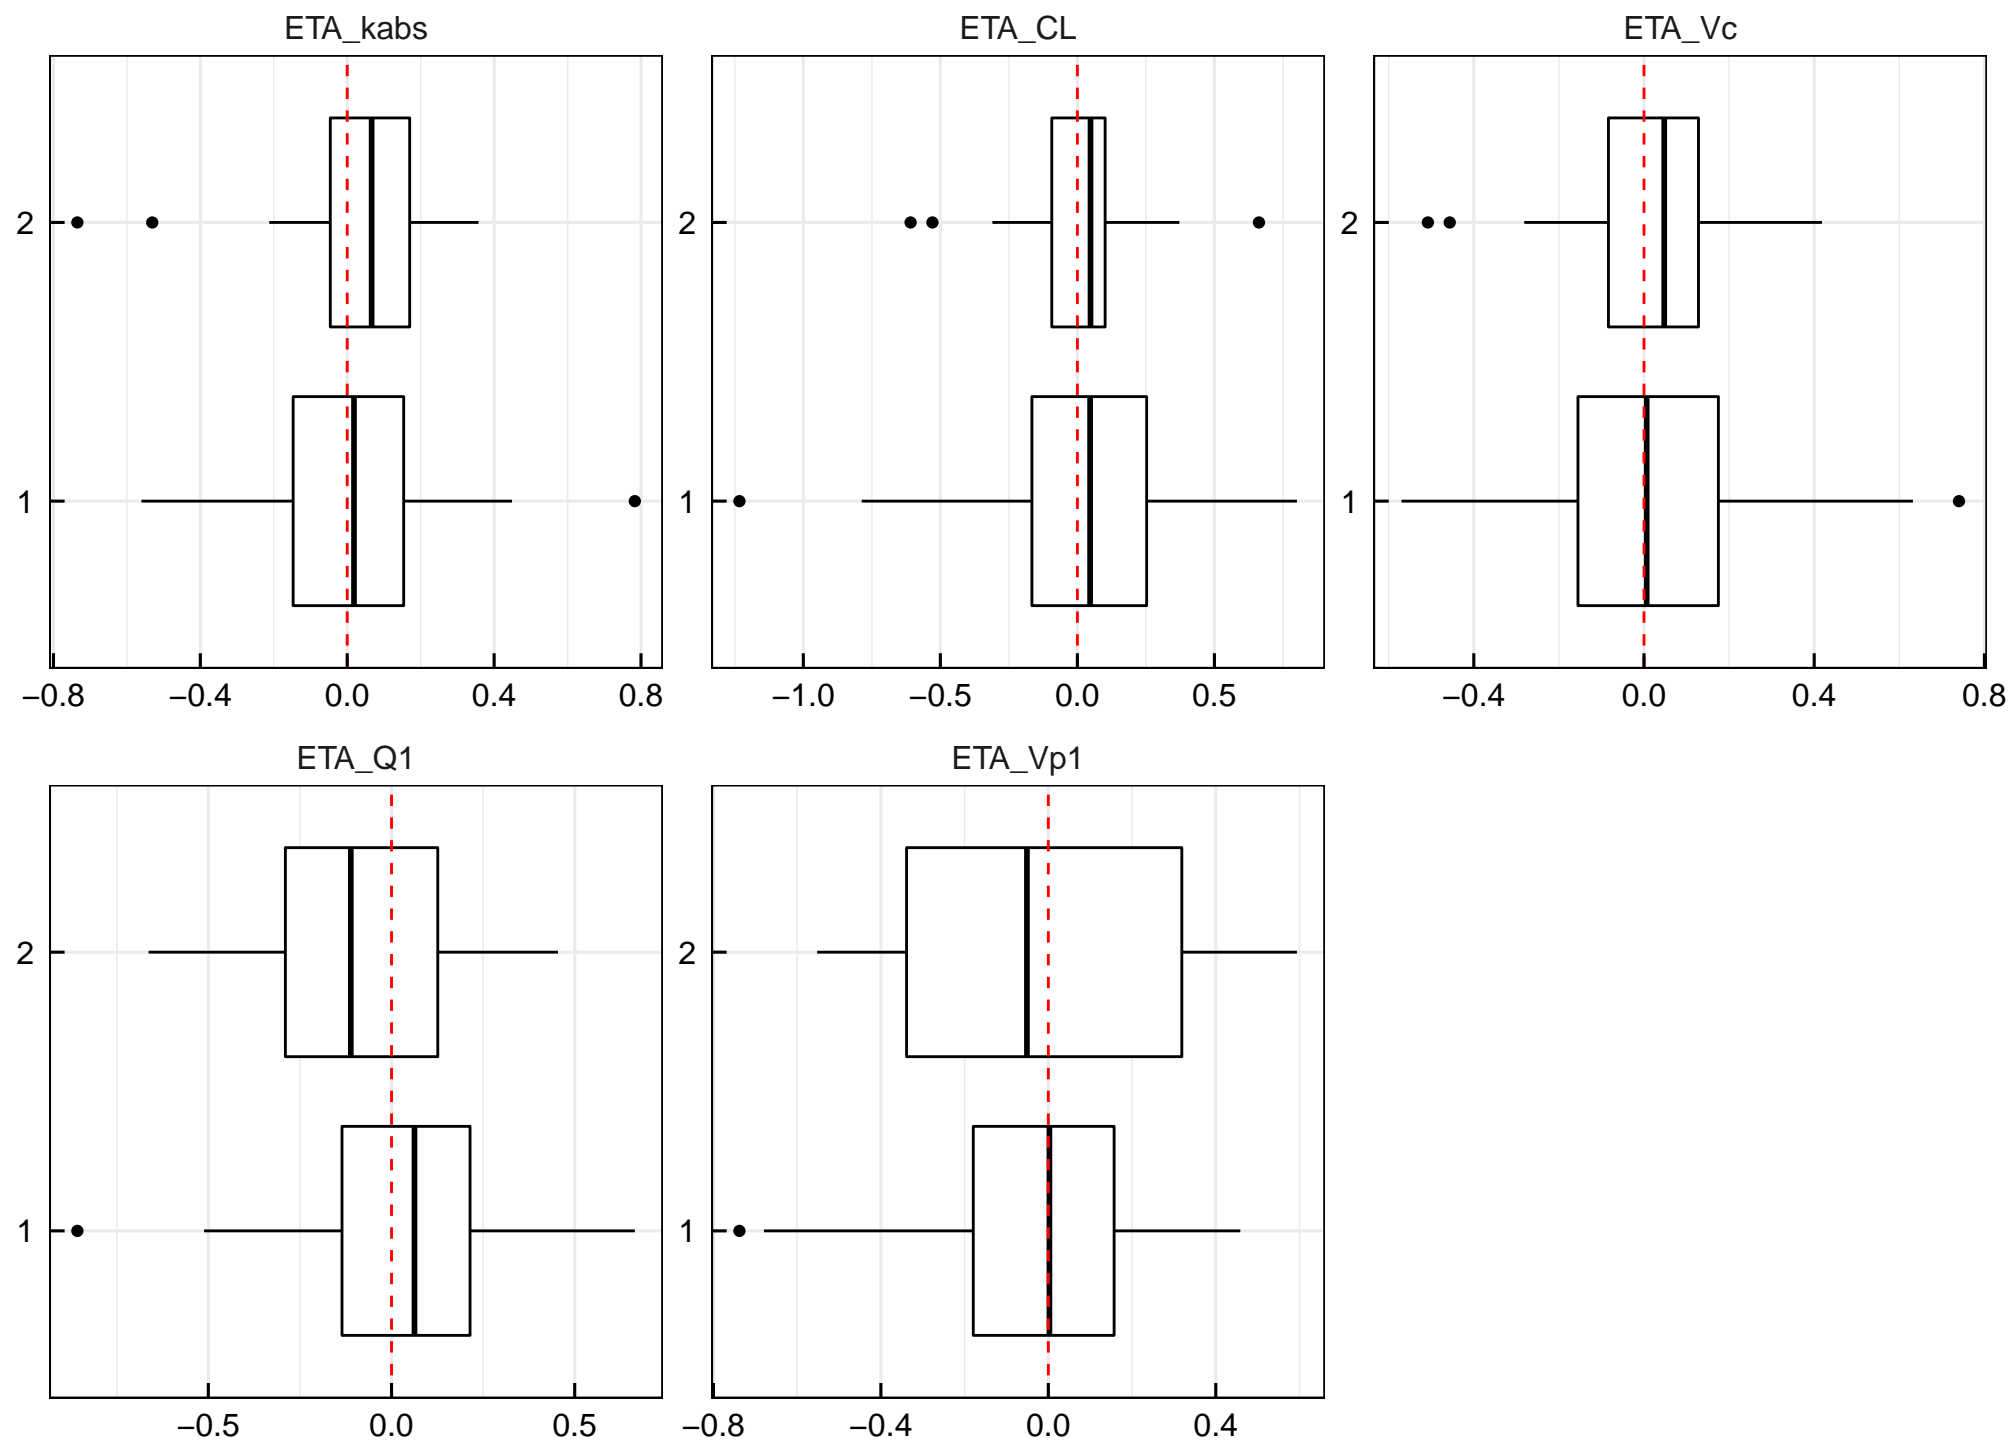

Covariate: SEX (Gender)

Individual random effects versus covariate

p-Value from t-test,  $p < 0.05$  suggests that means are different

1 (male): N=64

2 (female): N=20

p-Value  $\geq 0.05$
