

Covariate effects on parameter Vc

Reference individual:

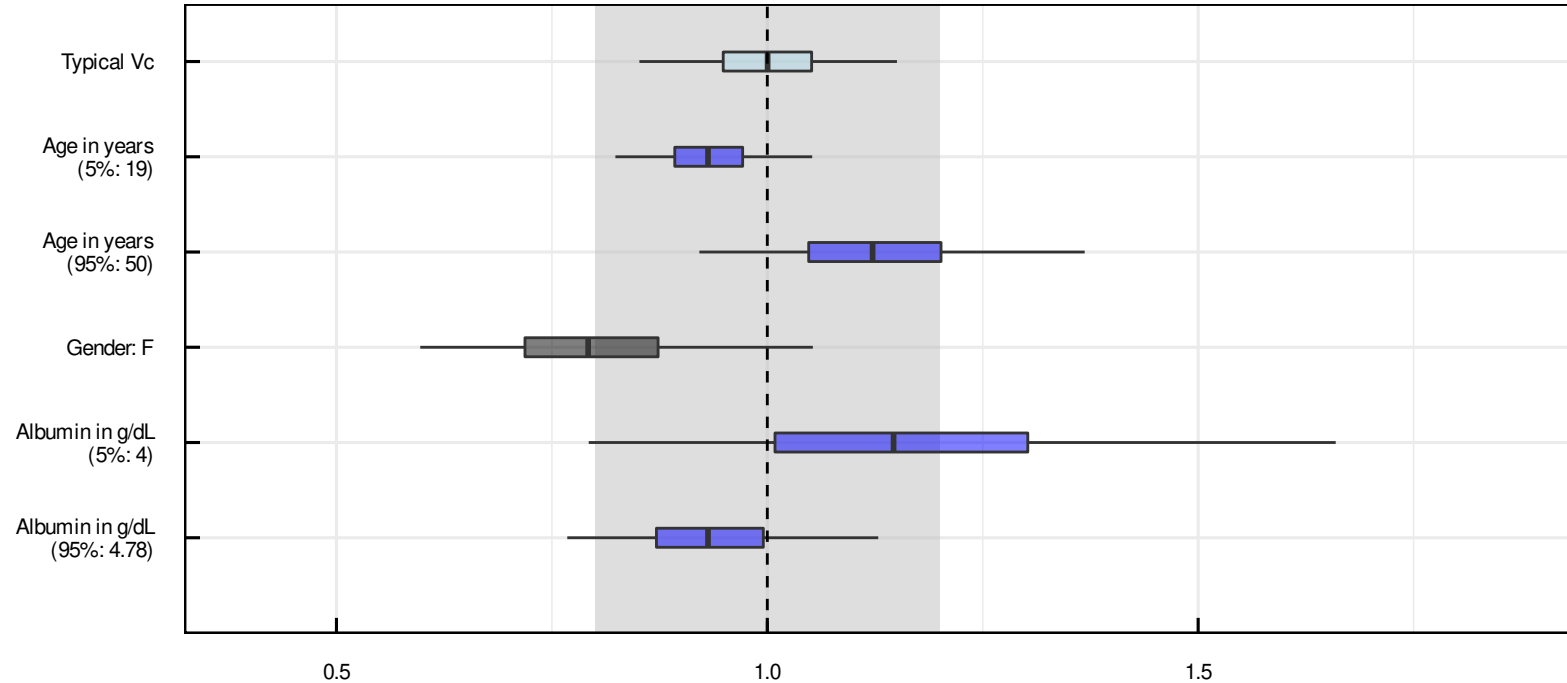

Age: 27.5 years

Albumin: 4.5 g/dL

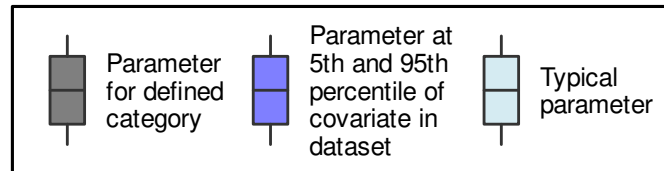

Creatine Kinase: 158 U/L

Weight: 65.7 kg

Gender: M

Change in parameter relative to reference individual
Box plots: 2.5% / 25% / 50% / 75% / 97.5% (uncertainty of covariate effect)

Covariate effects on parameter CL

Reference individual:

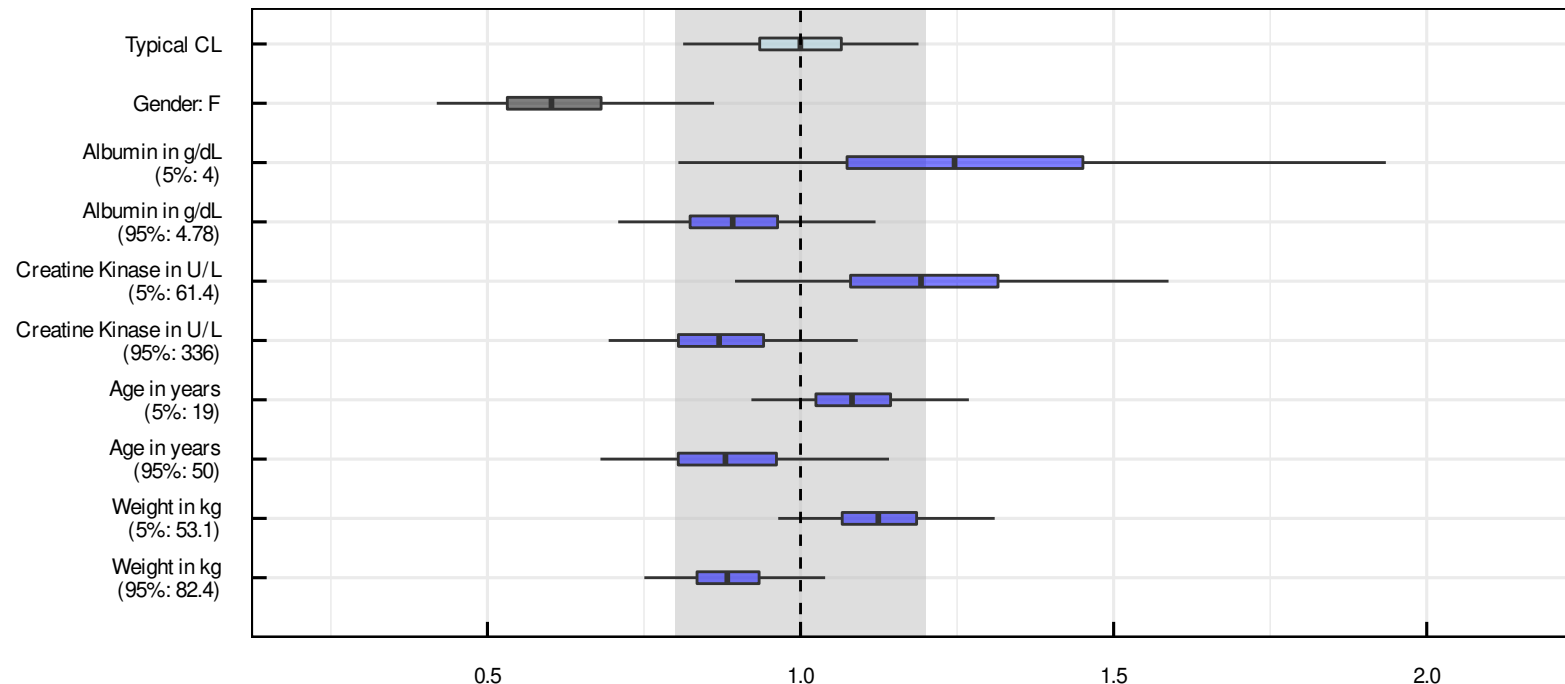

Age: 27.5 years

Albumin: 4.5 g/dL

Creatine Kinase: 158 U/L

Weight: 65.7 kg

Gender: M

Change in parameter relative to reference individual
Box plots: 2.5% / 25% / 50% / 75% / 97.5% (uncertainty of covariate effect)
